Notes. Daily frequency. The sample runs from February 4, 1994, the first FOMC meeting whose policy decision was announced on the day of the meeting, through May 29, 2026, and contains 8,132 trading days of which 258 are scheduled FOMC announcement days (3.2% of days, earning 21% of the cumulated equity premium). 1_{FOMC} equals one on the announcement day, which is the *last* day of a two-day meeting; $1_{FOMC,-1}$ and $1_{FOMC,+1}$ equal one on the trading day before and after it. Conference calls, unscheduled meetings, notation votes and the cancelled March 2020 meeting are excluded. Columns (1)–(5) are in percent per day. Newey-West standard errors with 5 lags in parentheses. *, ** and *** denote significance at the 10%, 5% and 1% level.

Table 2: The FOMC announcement premium: summary statistics

	FOMC days	Other days	All days
N days	258	7,874	8,132
Mean $Ret^M - R_f$ (%)	0.26	0.03	0.04
Mean $Ret^M - R_f$ (bps)	25.55	3.16	3.87
Annualized Sharpe ratio	3.47	0.42	0.52
Share of equity premium (%)	20.97	79.03	100.00
